

Please, please, do NOT allow cell phone usage on airplanes. It's bad enough going to the supermarket and having to listen to someone yacking their heads off, but at least you can move away from them there. You can't move in an airplane but must remain seated and belted into your seat. PLEASE DON'T ALLOW CELL PHONE USAGE ON AIRPLANES. You can already call once on the ground, and that's quite enough, thank you.

Thank you

P.S. I have a cell phone myself, but don't use it in public.
